

## ✓ St. Mary's & I-10 Bus Stop – SW Corner (SunTran # 13690)

ADA accessibility Score: 0

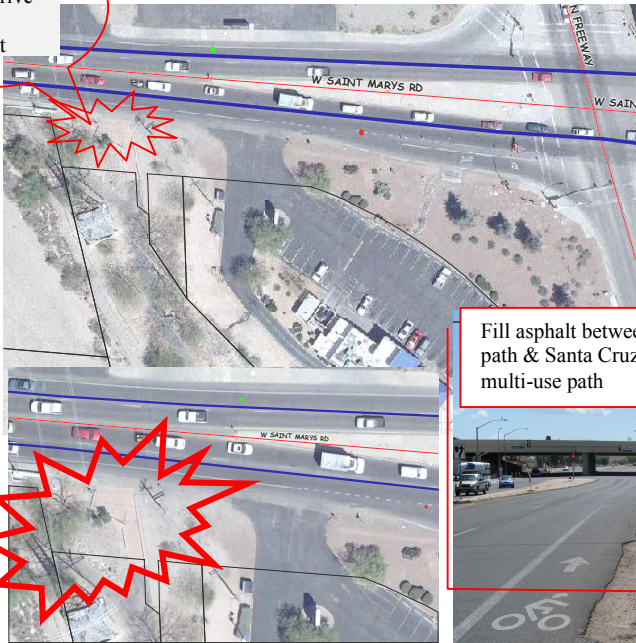

Ridership: boardings = 17, total = 22

Issue(s): Stop not connected

Note: Community (Public) ADA requested improvements

Solution(s): create/improve connection to stop from west. Move stop to Santa Cruz River Park multi-use path. Fill asphalt between bike route & multi-use path. Remove 3-post ends & concrete anchors (Safety Issue!!!) . Create pedestrian path in front of Burger King to connect stop to ADOT sidewalk crossing for underpass to east

Stop location  
west of drive  
way to  
restaurant

Remove 3-post ends & concrete  
anchors – Safety Issue – sticking out  
of ground 3-5” - hard open edges

Fill asphalt between bike  
path & Santa Cruz River  
multi-use path

**Stop completed:** Stop connected to sidewalk & riverwalk west of bus stop. Safety issue was corrected and road asphalt was extended to new sidewalk and bus stop pad with asphalt extension to Burger King parking lot. Further improvements to create sidewalk east of the bus stop in front of business to I10 frontage road require engineering and design.
